

Geography

Geography is a powerful tool for the development of attitudes and values and for the fostering of curiosity, open-mindedness and an appreciation of the world in which we live.

Geography is a changing subject and the skills needed to encompass the many different topics are an integral part of teaching throughout the school. Mapwork, physical, human and environmental geography are taught and a residential fieldwork trip is undertaken in Year 7 in order to illustrate some of the various elements of the course as taught in the classroom.

Although the achievement of excellent examination marks is of great importance, emphasis is placed upon the enjoyment and lifelong appreciation of a subject which has a wide-ranging impact upon the modern world.
